

Chronic Medicine Formulary

Subject to the following terms and conditions the medicine formulary as set out below shall apply:

1. Chronic application forms must accompany all first-time applications. All applications MUST include valid ICD10 codes.
2. If the prescriber or patient insists on a non-Formulary Product, where a therapeutic equivalent is available on the formulary, a co-payment will be levied at the point of dispensing.
3. Reference pricing is applied. If a product is prescribed that is more expensive than the reference price, the patient will need to pay the difference in price at the point of dispensing.
4. The examples below serve as a guide to the prescriber. Other generic products not specifically listed will be reimbursed in full if the price falls within the reference price range for that group.
5. A clinically relevant motivation is required when prescribing any product which does not appear on this list.
6. The formulary is subject to regular review. Care Cross Health reserves the right to update and change the formulary when new information becomes available, prices change or when new medicines are released.
7. While every effort has been made to ensure that products listed are available on the market, it is possible that some products may be discontinued by the manufacturers during the course of the year.
